

# THE CUES TERRARIUM

## PRODUCT TEST STATION

### YOU ASKED. WE LISTENED. WE LEARNED.

Welcome to the **NEW** era in product development at CUES!

We have incorporated a new **RIGOROUS** and **THOROUGH** testing process to validate the design and robustness of each of our new products before they go into production.

Our **CUES TERRARIUM** is one of these new tests. It is an accelerated **LIFE TEST**, designed to simulate the expected lifetime of a product based on its expected usage.

For our new camera, this means continuous operation of the camera plus all lights and motors while undergoing constant water spray with shock and vibration loading for **OVER 1,000 HOURS**.

What this means for you...

FEATURES	BENEFITS
Improved Sealing	More Uptime. Less Repairs.
Tamron Camera using Sony Sensor	Exceptional Image Quality
Circuit Board Consolidation with Protection Circuitry	Reduced Interconnects and Failure Points
WiFi Firmware Updates	Avoid Need to Remove the Tube
